

#### IO-Power USMC-12V1224-OA Series

### Automobile Heavy Current & Super Long-acting Model

# Online Uninterruptible Operation + Buck Boost Voltage Convertor Power System

IOP-USMC-12V1224-OA series is specifically designed for large power equipment vehicle load system, through vehicle cigarette lighter-powered uninterruptible operation of the system, such as on-board infrared camera, car video host, DVR/NVR 48 hour record, the range of temporary large discharge current device must be over 48 hours or longer-lasting forms online without interrupting the operation of the power system.

IOP-USMC-12V1224-OA products, using industrial-grade automatic lifting of buck boost voltage converter and industrial-grade protective metal casing and mechanical design of waterproof dustproof IP67. Importing the latest technology as high and low temperature resistant C-LiFePO4 lithium batteries, unique security management control of charge and discharge protection, low voltage and low power consumption ...number of proprietary technologies, achieving long-term safety of vehicle special high power loads and equipment new applications without interrupting the operation of power systems.

IO-Power USMC-12V1224-OA series, take online type does not interrupted of long-term power supply system design, special for strict requirements operation in the

system of not interrupted using. Its long-term of power time can over 48 hours above, for examples Cash transport van 48 hours surveillance system, bus lane records device, police car surveillance system, preservation patrol car, 48 hours lane records device camera system, emergency rescue system and mobile power supply system and so on, are very suitable for use.

IO-Power USMC-12V1224-OA series online type Uninterruptible Operation power system of the system components including:

- Input DC power port: car cigarette lighter DC 12-28V DC power input, automatic lift voltage converter from 18-20V /
   4A (5A Max) DC voltage and current, DC UPS power system charge and discharge operation power source.
- 2. Microprocessor modules: microprocessor for detecting input power management, battery management, battery management power control, output voltage management, system operations control detection and protection management, perform the dimensional transport co-ordination and control of the overall system management.
- 3. Charging and discharge control module: for battery voltage detection and charging management and the battery discharge management control functions, special design battery full charge and then enable directly power supply to load end features, it will reduced battery of using times and improve battery using life cycle. Auxiliary to low voltage protection and low voltage low power discharge proprietary protection mechanism, on battery of low voltage protection and the system fast recovery operation, provides best protection and efficient of operation mechanism.
  - 4. The DC power output port: DC power supply and discharge detection through microprocessor control and protection,

for loading device power requirement, corresponds to taking the appropriate current power supply, minimum 0.5A to maximum 7A DC current supply control.

- 5. The special enhanced protection measures: four seasons environment for high and low temperature change, efficiency and battery life, may have a serious impact, even used on the security issue. Therefore, for USMC-12V1224-OA series of vehicle-specific products, specially designed industrial grade sealed metal shell and flame resistant high temperature resistance waterproof fittings to avoid security problems in the use of the indoor and outdoor environment.
- 6. Resistance high and low temperature long-term C-LiFePO4 lithium batteries: the vehicle through sunshine will upgrade high temperature environment, it will operation in the system of not interrupted and more long-term using needs. The IOP-USMC-12V1224-OA series used customize of resistance high low temperature -20°C ~ +60°C long-term C-LiFePO4 lithium batteries, match metal protection shell and institutions design, it can bear car within low temperature -30°C ~ +75°C of environment temperature operation. And resistance high low temperature long-term C-LiFePO4 lithium batteries of high charging and discharging times and battery life, it can provides less power than the traditional systems more than twice times more electricity power capacity and 7 times more than double the service life cycle, full vehicle large-power-line machine without interrupting the operation of electric power systems of outstanding characteristics.

Special Description 1: Automobile internal by too Sun penetrating sunshine and car is confined does not ventilation environment, so will produced sunshine warming effect, in outdoor temperature up to 36°C, car within temperature by long time sunshine warming, car within will up to 60~65°C, Sunshine direct location will up to 65~70°C around, but as long as Sun sunshine no irradiation to of location, temperature will slightly below car within temperature about up 55~63°C around.

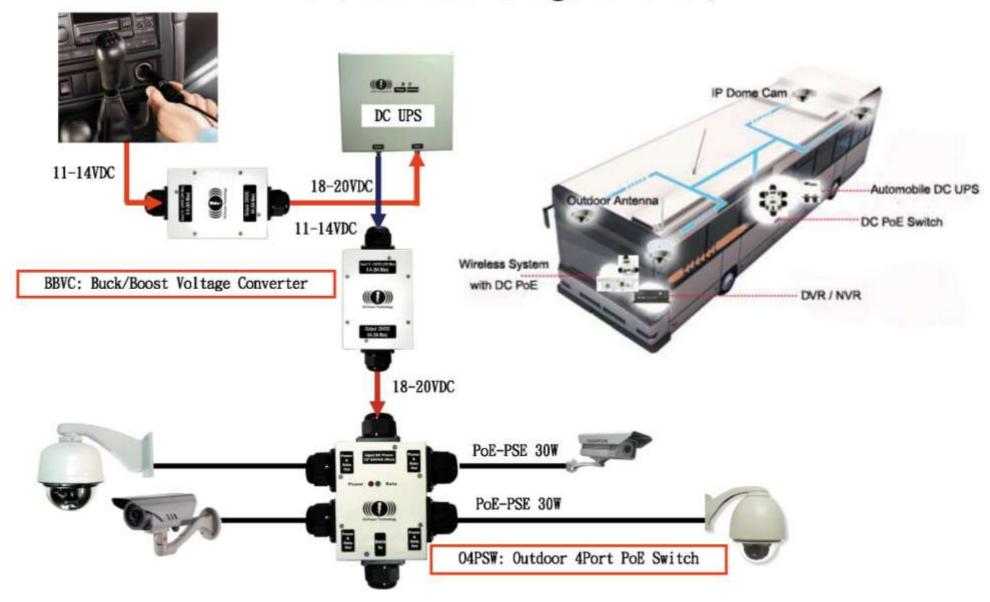

Special description 2: IO-Power USMC-12V1224-OA series online type does not interrupted operation power system, due to should car within environment of special high temperature requirements, used resistance high temperature roast paint package covered metal shell, in outdoor temperature up to 36°C, car within temperature by long time sunshine warming, car within will up to 60~65°C, in Sunshine direct products shell surface situation, shell surface temperature about 65°C, shell within temperature about 55~58°C, C-LiFePO4 Lithium Batteries temperature about 50~55°C;

IOP-USMC-12V1224-OA products, AM 10:00~ PM 4:00 under sunshine temperature test for a long time in the morning, all features of normal operation and provide stable DC 11.5V~14.4V+-3% power to the cameras inside and outside the

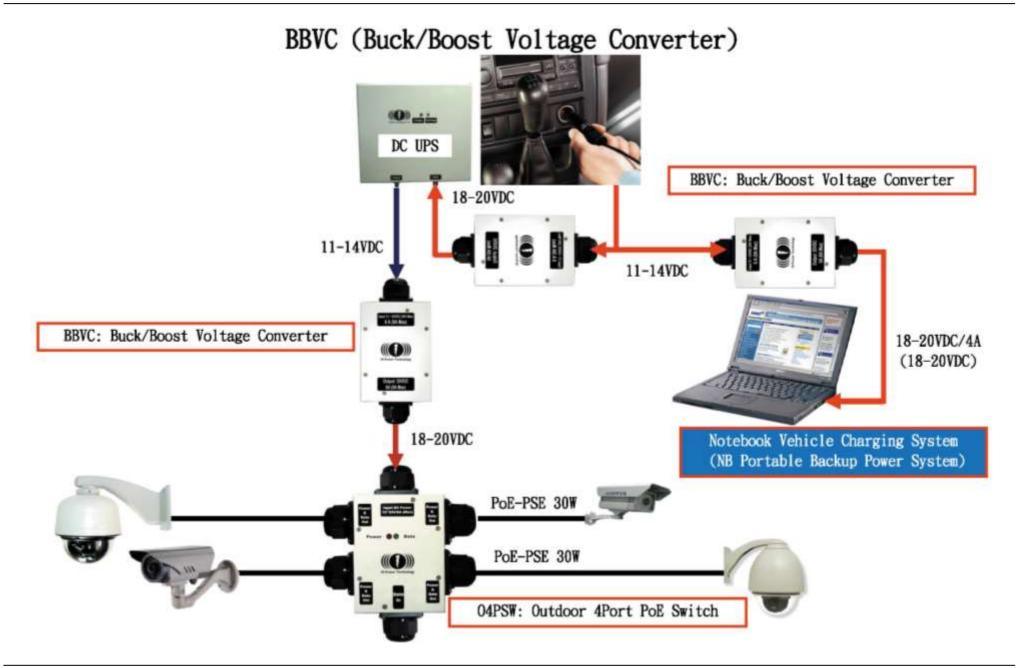

# BBVC (Buck/Boost Voltage Converter)

## IOP-USMC-12V1224-OA Series Specification

Model	USMC-1212-06B	USMC-1216-07B	USMC-1218-08B	USMC-1224-09B	USMC-1228-10B
Automobile High Temperature Model M12 Connector Aluminum Radiating Airtight Housing IP 67	Resource learning in the Course Property Control of the Course of the Co				Output DC power DC 12V/6A Max  Input DC power DC 20V/4A (5A Max)  DVR / NVR 16Ch 4TB HD Monitoring recording and playback video host  (BBVC) Buck Boost Voltage Convertor  Input DC power 12"24VDC  Mobile Cigar Lighter
Built In C-LiFePO4 Lithium	148 WH	206 WH	235 WH	297 WH	355 WH

- Input power supply over-current protection
- Input of positive and negative polarity reverse protection
- Input short-circuit protection
- Input lightning or power surge protection up to 1300W
- Battery full charge, input power supply power directly to the load, maximum output power is reached, at the same time avoiding battery overcharge protection
- Battery intelligent charging system protection and the float charge function
- Output power limit voltage protection
- Output power limit current protection
- Output of positive and negative polarity reverse protection
- Output short circuit protection
- Output lightning or power surge protection up to 1300W
- Battery voltage is less than 12.8V, MCU microprocessor automatically starts into the battery low discharge warning state
- Battery discharge below the 11.7V,MCU microprocessor automatically stop discharging into the battery low voltage protection status
- Battery voltage is lower than 11.2V, MCU microprocessor goes into sleep protection status
- Battery low voltage static ultra-low power protection
- When the input power, MCU microprocessor automatically starts recovery operation mechanism
- After discharge low voltage battery protection to restart the battery, special designed discharge voltage protection function
- Discharging under load, batteries have added support mode power supply operation
- Match the automatic Buck Boost Voltage Convertor (BBVC), with car cigarette lighter power connection charging port and protection (including fuse)
- Match the automatic Buck Boost Voltage Convertor (BBVC), with buck boost voltage, fixed voltage, and stabilizing the voltage to upgrade effect of power supply protection.

charge & 0.5C discharge	more than 90% capacity)	
(Battery capacity remaining	@ 45°C 1600 Times	
after using 80%, the defined	@ 50°C 1200 Times	
service life will terminate)	@ 60°C 550 Times	
	@ 60°C 720 Times 70%	
Industrial Housing &	Aluminum Airtight Housing	
Connector	IP 68 M12 Connector	
Connector Type	Vehicle charging circuit or car cigarette lighter, enter 12~28V DC voltage / current 6A (8A Max)	
	DC output: 12V DC Jack to DC Jack connector	
	Input / Output I/O interface: RS-485 (optional function)	
Operating Temperature	-35°C ~ +75°C (Including the chassis of the machine working temperature tolerance)	
(Discharge Temperature)	-20°C ~ +60°C (Excluding institutions, the battery operating temperature tolerance)	
	+20°C ~ +40°C Battery Capacity:100%	
	-10°C Battery Capacity : 60%	
	-20°C Battery Capacity : 48%	
Charging Temperature	-35°C ~ +75°C (Including the casing machine operation)	
Storage Temperature	-35°C ~ +75°C , Recommendations at +20°C ~ +30°C environmental temperature for storage.	
Rel. Humidity	10~95%RH	
Storage Time	Do not wake the system can store 12 months	
	(after you wake the system, each 3 months charging 1 times; Please fully charging battery in first times to use)	

勁電科技有限公司 台灣新竹市 30053 北區金竹路 100 號 1 樓 IO-Power Technology Co., Ltd 1F., No.100, Jinzhu Rd., North Dist., Hsinchu City 30053, Taiwan <a href="http://www.io-power.com">http://www.io-power.com</a>. e-mail: <a href="http://www.io-power.com">io-power.com</a>. http://www.io-power.com</a>. e-mail: <a href="http://www.io-power.com">io-power.com</a>. e-mail: <a href="http://ww

Dimension	DC UPS : 210(L) x 145(W) x 195mm(H) ; BBVC : 195mm(L)x92mm(W)x48mm(H)			
Weight	2.5Kg + 0.5Kg(BBVC) 3Kg + 0.5Kg(BBVC) 3.2Kg + 0.5Kg(BBVC) 3.8Kg + 0.5Kg(BBVC) 4.5Kg + 0.5Kg(BBVC)			
LED Indicator	1. AC input (Converted to DC power supplies): red light constant light, show on battery in full charge status.			
	2. AC input (Converted to DC power supplies): red light flashing display, represents the battery is charging status.			
	3. When the battery is not charging, insert the 12VDC device load discharge, discharge the green light constant light show,			
	shine on behalf of low voltage in discharge, please do the charging operation			
	4. Simultaneous charging of the battery, insert the 12VDC device load discharge, discharge the green light constant light			
	show			
	5. AC input (Converted to DC power supplies): quick shine a red light shows that represents an input power supply or the			
	input port or the battery charge State, please remove the input power terminal as soon as possible.			
	6. Insert the load discharge 12VDC devices: fast shiny green display on behalf of power output or output port or abnormal			
	battery discharge condition is request to remove output power connector as soon as possible.			
	Note 1: when the system alarm status, please remove the cause as soon as possible the reason for the exception. When			
	after eliminating abnormal, just re-switch input power supply or plug power to supply again, the red LED flashing light signal			
	will resume once per second in charging status. Those processing will remove most of the alarm status, allow the system to			
	resume normal operation.			
	Note 2: when a temporary abnormal use or abnormal operation occurs, causing the system to start the alarm status, specially			
	designed automatic recovery mechanism 3 times the purpose and again after every 10 seconds to detect anomalies and try			
	to exclude temporary malfunction alarm state.			
Housing	IP67			
Approvals	CE & FCC			
Installation	1.Street lamp pole mount			
	2.Upright pole mount			
	3.Wall mount installation			

勁電科技有限公司 台灣新竹市 30053 北區金竹路 100 號 1 樓 IO-Power Technology Co., Ltd 1F., No.100, Jinzhu Rd., North Dist., Hsinchu City 30053, Taiwan <a href="http://www.io-power.com">http://www.io-power.com</a>, e-mail: <a href="http://www.io-power.com">io-power.com</a>, ttp://www.io-power.com</a>, ttp://www.io-power.com</a>, e-mail: <a href="http://www.io-power.com">io-power.com</a>, ttp://www.io-power.com</a>, e-mail: <a href="http://www.io-power.com">io-power.com</a>, ttp://www.io-power.com</a>, ttp://www.io-power.com</a>, e-mail: <a href="http://www.io-power.com">io-power.com</a>, ttp://www.io-power.com</a>, e-mail: <a href="http://www.io-power.com">io-power.com</a>, ttp://www.io-power.com</a>, ttp://www.io-power.com</a>, e-mail: <a href="http://www.io-power.com">io-power.com</a>, ttp://www.io-power.com</a>, ttp://www.io-power.com</a>

	4.DIN Rail (Optional)	
Warranty	Intelligent charge & discharge main board & IP66 housing & parts support two years limited warranty.	
	Customize C-LiFePO4 lithium batteries support one year limited warranty.	

Note 1: Battery Capacity is +- 5%.

Note 2: Product specifications change, without notice, consultation with agent or dealer before buying the latest specifications.

Note 3: detect the temperature reached -30°C, start the red LED have low temperature warning, reach low temperature -35 °C, a start-stop system function will enable, when temperatures returned to above -30°C, normal operation will resume.

Note 4: detect the temperature reached +70°C, start red LED have high temperature warning, reach high temperature +75°C, a start-stop system function will enable, when temperatures back below +70°C temperature, normal operation will resume.
